PROGRESS REPORT

Evaluation of Satellite Imagery as an Information Service for Investigating
Land Use and Natural Resources (Skylab). NASA Contract NAS 9-13364

This report covers the period from May 1, 1973, to July 31, 1973. According to verbal and written communications with the Technical Monitor, Mr. Roger D. Hicks, it was agreed that no significant work would commence prior to August 1, 1973. This date was the earliest expected time for receipt of data from Skylab II. Unfortunately, no photo coverage was acquired for any portion of New York State during this period. Therefore, the next earliest date for data receipt is expected to be about November 1, 1973.

A milestone plan is being prepared and will be submitted during the first week of August. No other significant events occurred during this period.
